

Xylem

This is Xylem

- A leading global water technology provider
- Nearly \$4 billion in revenues
- 12,700 global employees
- We devote our technology, time and talent to advance the smarter use of water

xylem

Unmatched Global Presence in Our Industry

Over 12,700 employees ... 320 global locations ... doing business in 150+ countries

How Does Xylem Solve Water?

Water Productivity

How efficiently clean water is moved, treated, tested and used.

Water Quality

How efficiently wastewater is moved, treated and tested as it is returned to the environment.

Water Resilience

How to protect and recover from water emergencies such as floods, droughts and contamination.

Xylem is focused in the water challenges

PRODUCTIVITY

Problem:

Delivery and use of water as a factor of production is highly inefficient

Solutions:

- Energy efficient pumps
- Advanced water treatment
- Analytical instrumentation

QUALITY

Problem:

Management of wastewater is energy-intensive, expensive, and inefficient

Solutions:

- Smart pumps
- Advanced wastewater treatment
- Analytical instrumentation

RESILIENCE

Problem:

Communities face rising economic risks from water variability (flooding, scarcity)

Solutions:

- Dewatering pumps
- Advanced water treatment
- Analytical instrumentation

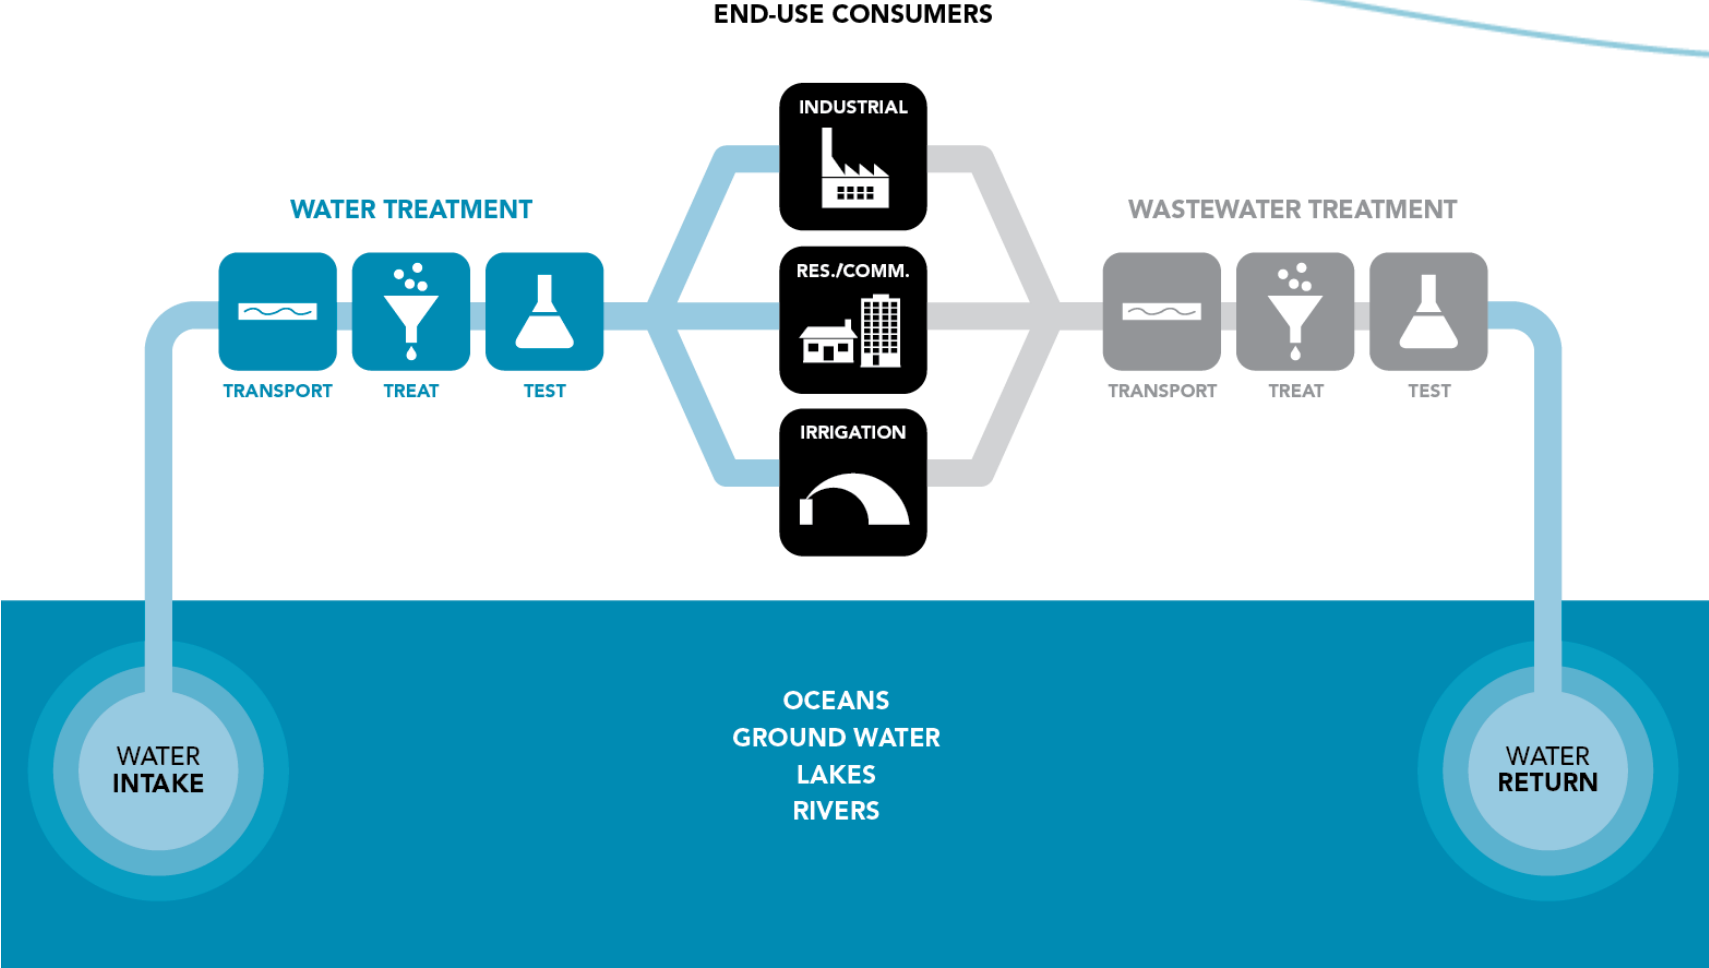

GLOBAL LEADER IN WATER APPLICATION SOLUTIONS

Unmatched Global Presence in Our Industry

12,700 employees ... 360 global locations ... doing business in 150+ countries

We Span the Entire Cycle of Water

Unique Global Assets

- Unparalleled water expertise
- Leading brands and technologies
- Diverse product portfolio
- World-class distribution channels
- Diverse customer base
- Robust aftermarket opportunities

Diverse Customer Base, including ...

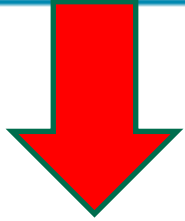

Leading Brands, including ...

Focused on solving the most important water challenges

Xylem has more than 100 years of expertise in providing innovative products and solutions to handle water and wastewater pumping. With global direct sales and service capabilities in 150 countries, we work closely with our customers to deliver trouble-free and energy-efficient operations.

- Reliable and efficient pumps engineered to transport water and wastewater
- Extensive range of monitoring and control products and solutions to optimize performance
- Comprehensive TotalCare service capabilities
- Extensive application know-how

Leading brand: Flygt

Flygt brand: Made in Sweden

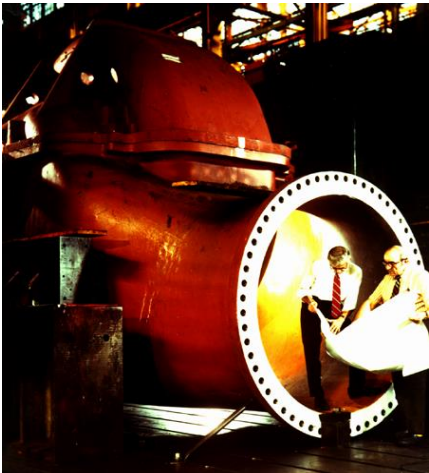

Emmaboda Sweden: The largest production plant in the group.

Production of heavy pumps dry and submersible, over 150.000 different types.

In 1947 we invented the submersible pump
Today world leading!

Leading brands: Flygt, Godwin, and Grindex

Xylem is the global leader in specialty pumping to move unwanted water and liquids. We design, manufacture, and rent the industry's best pumps. Our hands-on experience means we have the deepest application and engineering expertise on the market. This has earned us a world-class reputation for reliability and quick response.

With 79 branches worldwide, we are a trusted technical resource for our customers in rentals and sales. We offer:

- Pumps and intelligent controls for dewatering, water and wastewater, oil and gas, mining, and construction applications
- Technical application support
- Turnkey solutions and system design - including pump sales, rental, and on-site service - to remove unwanted liquids
- Engineering expertise and continuous product development focused on pump performance and efficiency

Leading brands: Flygt, Leopold, Sanitaire, and Wedeco

Xylem provides quality equipment to treat water for consumption and wastewater to be returned responsibly to the environment or for reuse. Our proven products and technical designs provide customers with optimized and sustainable solutions that help solve their water challenges:

- Biological wastewater treatment systems
- Filtration and clarification systems
- Ultraviolet and ozone disinfection systems
- Comprehensive TotalCare services portfolio with technical support available

We provide integrated solutions for use in municipal, food and beverage, mining, marine, pulp and paper and agricultural markets that are backed by extended warranties and process guarantees from one source.

ICEAS = Intermittent Cycle Extended Aeration System

Blowers
Years of experience enable us to provide the right blower type like centrifugal, rotary lobe, screw rotor, etc. to match your operational aeration requirements.

Aerators
Sanitaire Silver Series II is the most widely used fine bubble diffused aeration system today.

Mixers
Flygt compact mixers provide dog free, efficient hydraulics and reliable operation.

Pumps
The Flygt submersible N-Pumps have been engineered to give highly efficient, reliable and trouble-free pumping over long duty periods.

Decanters
Sanitaire decanters facilitate easy access that makes maintenance straightforward, while the resilient construction enables reliable, lifelong operation.

Control Systems
The ICEAS control system makes it easy for the operator to understand and make cycle changes to optimize the plant performance.

Analytics

Xylem provides premium field, portable, online and laboratory analytical instrumentation where precise measurement is critical in applications such as water, environment, food and beverage, and pharmaceutical.

Sensors, instruments and solutions:

- Online, field and laboratory water quality instrumentation
- Temperature and data logging systems
- Flow, level and Doppler technology
- Systems to ensure product quality

Leading brands: YSI, WTW Bellingham + Stanley, Ebro, Global Water, MJK, OI Analytical and SI Analytics
